SONA SKY

Introducing the Sona Sky® wireless permanent makeup machine by Kwadron. Ergonomic, perfectly balanced, lightweight, and slim. It features innovative technological solutions such as Needle Jump Start®, Voltage Stabilization System®, and Ergo Grip Comfort®, ensuring stable, even, and precise work even during longer sessions. Equipped with an additional power module and RCA connector. Elevate your creativity to new heights.

01

SONA SKY

Wireless with interchangeable power module and RCA connector

Backup power module + RCA connector. Conduct long pigmenting sessions without a cable, and if needed, you can also connect the machine to the power supply.

ErgoGrip Comfort (EC)

The ergonomically designed grip system enhances precision and reduces hand strain, even during prolonged and intensive use, ensuring that working with the Sona Sky machine is more precise and comfortable.

Voltage Stabilization system (VS)

The voltage stabilization system ensures consistent device performance at every stage of its usage, regardless of the battery charge level. The machine only shuts down when the battery voltage reaches its minimum, guaranteeing uninterrupted operation.

Needle Jump Start (JS)

The enhanced start-up system ensures precise and uniform skin puncturing from the very first moments of device operation, regardless of the skin

SONA SKY

Specification:

- Stroke - 3.0 mm
- Weight with power module (battery) - 110g
- Power supply-700 mAh
- Dimensions-137.5 mm x 23.5 mm
- Working time to-4-5h
- Motor-5W
- Needle extension adjustment-0-5 mm
- Total vibration value-max 2.5 m / s²
- Charging - 5V USB-C
- Operating voltage-4.5-12 V
- Handle diameter-19mm

SONA

02

SONA

A wired PMU machine, perfect for creating soft, naturally-looking powdering and shading. Its lightweight, ergonomic design, and minimal vibrations make long pigmentation sessions less tiring. Ultralight and stable. A gentle touch of beauty.

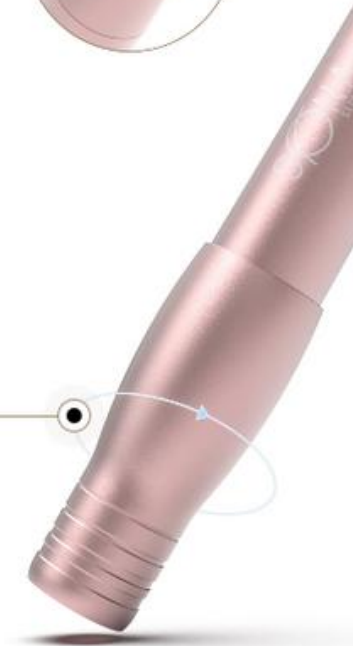

Covered RCA socket

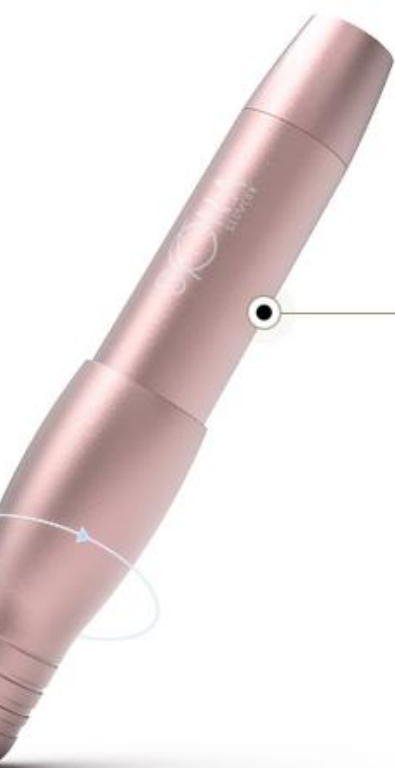

Thanks to the use of a standard RCA socket, the machine can be connected to most power supplies.

Needle extension adjustment

The possibility of adjusting needle extension (0-5mm) allows for controlling the pigment flow. This ensures a clean working area, eliminating the formation of pigment "puddles".

Ultralight aluminum body

The compact housing, measuring 11cm in length, and a grip with a diameter of only 18mm conceal a highly durable 4W motor. The device's weight is evenly distributed, making it securely fit in your hand and ensuring effortless operation.

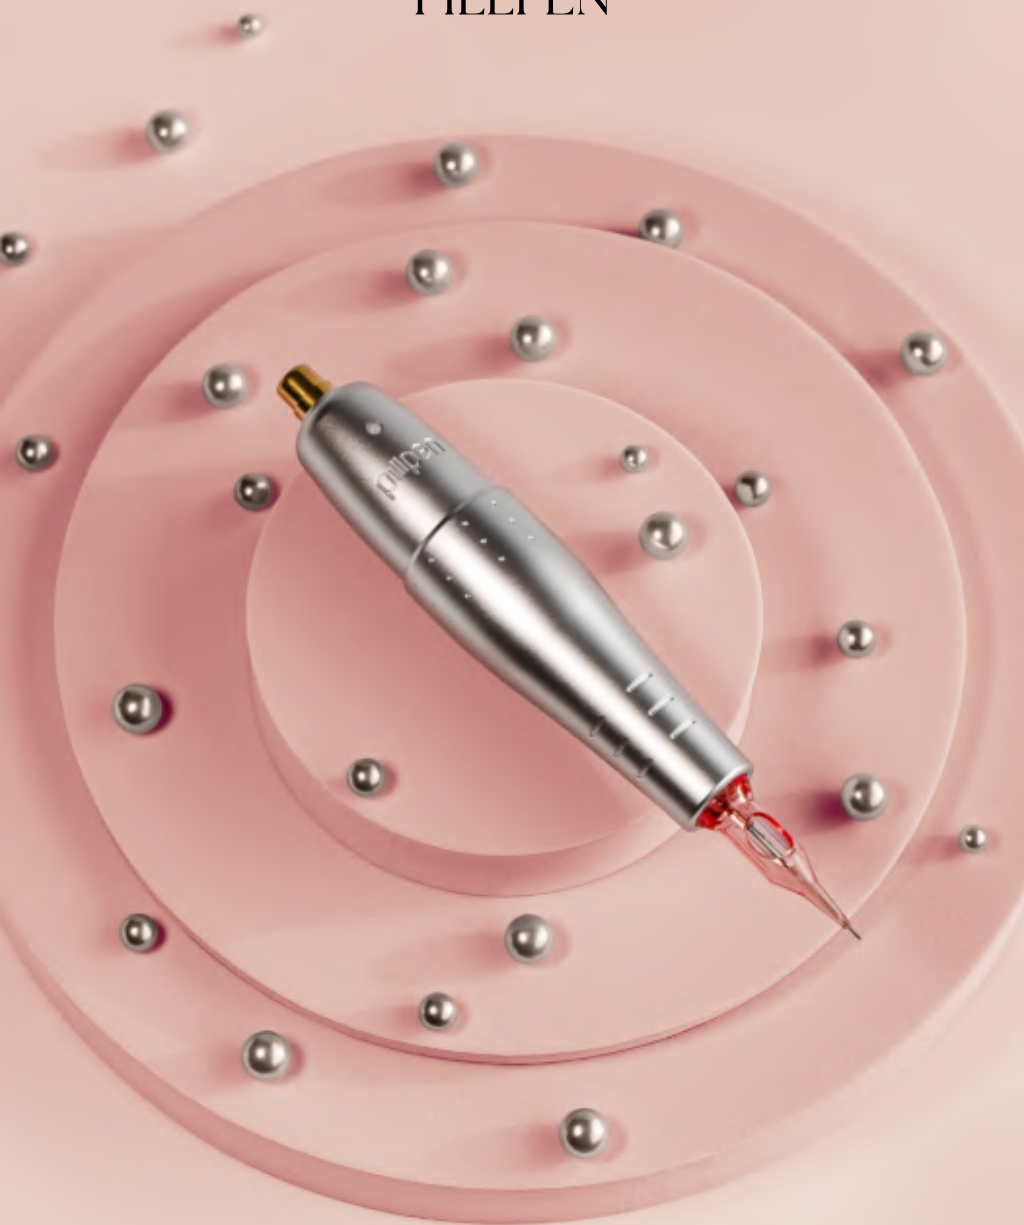

- **Specification:**

- power: 4W
 - grip diameter: 18 mm
 - length: 11 cm
 - weight: 80g
 - stroke: 3 mm (ideal for permanent makeup and micropigmentation)
 - stroke regulation: 0-5 mm
 - RCA socket (can be used with standard Jack - RCA)
 - compatible with GLOVCON Sona power supply as well as any other standard power supply
 - lightweight construction
 - failure-free system
- 12-month guarantee

03

PILLPEN

03

PILLPEN

The wired PMU machine, known as the King of Details, empowers you to create beautiful, intricate lace-like details.

Ideal for contours and lines, its vibration-dampening technology enhances precision, significantly reducing working time. Powerful, stable, and ergonomic.

RCA socket

Thanks to the use of a standard RCA socket, the machine can be connected to most power supplies.

Needle extension adjustment

The possibility of adjusting needle extension (0-5mm) allows for controlling the pigment flow. This ensures a clean working area, eliminating the formation of pigment "puddles."

PILLPEN

Aluminum body

The compact housing, measuring only 11cm in length, and the grip with a diameter of just 17mm conceal a very durable 4.5W motor, ensuring effective pigment implantation under the skin.

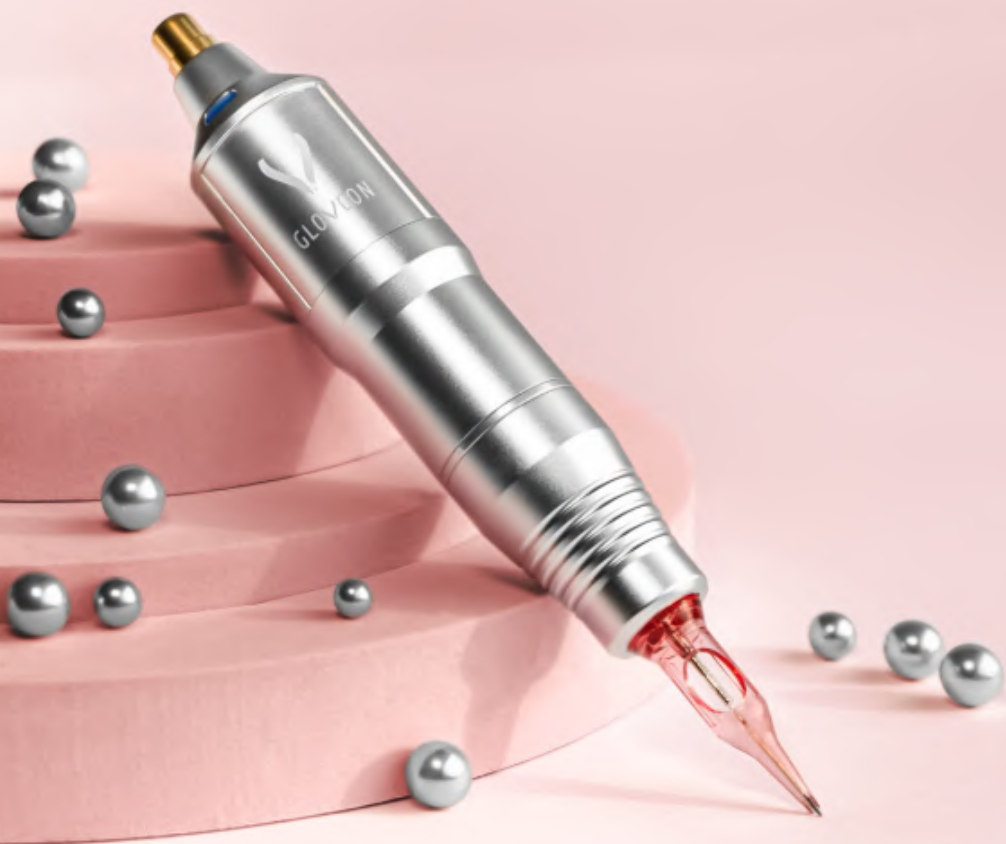

Specification:

- power: 4.5W
- grip diameter: 17mm
- length: 11cm
- weight: 120g
- stroke: 3mm (perfect for permanent makeup and micropigmentation)
- adjustable needle extension 0-5mm
- RCA socket (possibility to use standard cables for Jack - RCA)
- compatible with the GLOVCON XPS Purple power supply but also with any other standard power supply
- super light construction
- 12-month warranty

04

INOX LADY

04

INOX LADY

The wired PMU machine, hailed as the Queen of Powdering, enables you to achieve beautiful effects, whether transparent or heavily powdered. With it, achieving the perfect diffusion is easier and faster, thanks to the special technology allowing for vibrational pigment implantation. Powerful and intuitive.

INOX LADY

RCA socket

Thanks to the use of a standard RCA socket, the machine can be connected to most power supplies.

Needle extension adjustment

The possibility of adjusting needle extension (0-5mm) allows for controlling the pigment flow. This ensures a clean working area, eliminating the formation of pigment "puddles."

Durable motor

The aluminum casing houses a very durable 4W motor, ensuring effective pigment implantation under the skin.

04

INOX LADY

Specification:

- power: 4W
- stroke: 3mm
- works with every power supply
- light construction
- no vibration
- failure-free system
- 12 months warranty
